DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 13, 29, 45 and 49 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-13 of U.S. Patent No. 6,707,852. Although the conflicting claims are not identical, they are not patentably distinct from each other because the invention being claimed is a broader recitation of the same invention being claimed in the above US Patent. Therefore, the

application claims are encompassed by the above patent. A terminal disclaimer is required so as to insure that, were the application to mature into a patent, both patents would be commonly owned in their lifetimes.

Allowable Subject Matter

3. Claims 13, 29, 45 and 49 are allowed.
4. The following is an examiner's statement of reasons for allowance: The present application relates to video signals encoding method and apparatus. The various prior art of record fails to anticipate or render obviousness the determination of scene change in a motion video image represented by the motion video image based at least in part on comparing the current absolute pixel difference to a filtered previous absolute pixel difference and in combination with other limitations in claims 12, 29 and 45.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a. Chen et al (US 6,335,990) discloses a system and method for spatial temporal-filtering for improving compressed digital video.
- b. Dopp et al (US 5,606,373) discloses methods for repeated field detection.
